

April 20, 2023

To All the Members of the Presbyterian College Community:

It is a joyous occasion to be celebrating the scholarly and creative accomplishments of Presbyterian College students. Honors Day at PC represents the best of who we are and reflects the essence of what we do as a learning community. The academic work you will see today comes in the form of presentations, poster sessions, and performances. These culminating experiences demonstrate the impressive academic work that students pursue with faculty mentors in the College of Arts and Sciences, in the School of Pharmacy, and in our Physician Assistant and Occupational Therapy program. Congratulations to all the students whose work is being highlighted today!

Students from all departments and programs on campus participate in research opportunities, available during both semesters and in the summer. Since a capstone is required for all majors, PC students are able to explore scholarship in their chosen field. Collaborative student-faculty research is at the heart of PC Summer Fellows program, and some students carry out honors projects as part of their major. These scholarly experiences introduce students to the value of pursuing the life of the mind and launch them into further study and exploration for their post-PC careers.

I also want to recognize the outstanding dedication and effort of the faculty members who have served as research advisors, academic mentors, creative collaborators, moderators, and organizers for this event. Dr. Stefan Wiecki leads a talented group of faculty, staff, and students who produce this important celebration of academic work each year at Presbyterian College. Thank you for your dedication to making the magic of Honors Day happen.

Please enjoy the 2023 Honors Day Symposium!

Sincerely yours,

Kerry E. Pannell, Ph.D.
Provost
